

# SERVERS AND STORAGE

## WE KEEP YOUR FILES AND NETWORK SAFE:

A server is engineered to manage, store, send and process data, 24 hours a day, 7 days a week, 365 days a year. The equipment needs to be running all the time and at its highest capacity. We are here to make sure that happens. We want to help you make sure your files and network are secure at all times and have a reliable centralized data storage for shared resources.

Let's talk storage: We can help support your storage solution to increase reliability, decrease downtime and support growing applications.

## MORE CRAZY FACTS:

- **A Scalable Solution** – We will work with your engineers to understand your business today and tomorrow, ensuring your solution is scalable for future growth.
- **No Visitors Allowed** – Preventing outside and unauthorized users from accessing places they shouldn't be. Viruses are also not allowed!
- **Find Files Fast** – Reduce costs by ensuring high-speed file and database retrieval.
- **Multi-Manufacturer Support** – We are not married to one manufacturer. We will make sure the right solution is chosen for your needs.
- **Don't Worry** – A worry-free guarantee comes with all hardware. We are very confident it will be reliable and fully supported.
- **Oh No, Where Did It Go?** – A centralized backup system is necessary to make sure all data can be retrieved from one place for all users.

## THE NETWORK CRAZE ADVANTAGE:

With Network Craze, you not only get quality products, but the quality products you need – not the ones the manufacturer says you need, the ones you *really* need. This approach gives you the ability to stretch your IT budget while getting fast delivery, a lifetime warranty and an expert sales team. Offering all the top manufacturers, Network Craze is a one-stop shop for all of your data and voice technology, cabling and storage needs.
