

Servers and Storage

WE KEEP YOUR FILES AND NETWORK SAFE

A server is engineered to manage, store, send and process data, 24 hours a day, 7 days a week, 365 days a year. The equipment needs to be running all the time and at its highest capacity. We are here to make sure that happens. We want to help you make sure your files and network are secure at all times and have a reliable centralized data storage for shared resources.

Why our Servers and Storage?

- Scalable – Our engineers will work with you to understand your business today and ensure you are scalable into the future.
- Secure – Stop unwanted visitors and viruses into your network.
- Efficient – Reduce costs with high-speed file and database retrieval. A centralized back up system makes this simple.
- Options – We are not held hostage to one manufacturer. We will make sure the right solution is chosen for your needs.
- Worry Free – A worry-free guarantee comes with all hardware. Your equipment will be reliable and fully supported.

The Network Craze Advantage

At Network Craze, we're as crazy (I mean, as passionate!) about your network as you are. We understand that only you know what's best for your network, your budget and your business. With that in mind, we deliver quality products that your network, your budget and your business need. Allowing you to extend the life of your current IT hardware, helping you stretch your budgets, receive fast delivery, benefit from a Lifetime Warranty and have access to expert sales and support teams. By offering all the top manufacturers in the industry, we are a one-stop shop for all of your data and voice technology, cabling and storage needs.
